

braxx— wall saw / wire saw conversion

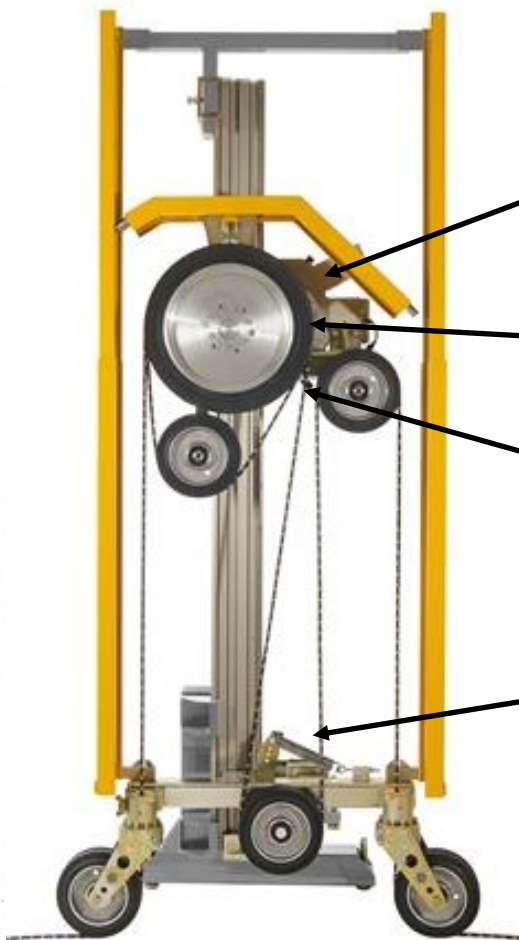

WHAT'S NEWZ

wire sawing

Electric Wire Saw WB6P

The compact one-man wire saw with 6 plus 2 m/6.6 plus 20 ft wire storage for complex sawing tasks

The braxx system's „small“ wire saw can be used with the saw head SB320 tornado as well as with the SB200 typhoon, being in line with the modular concept. The patented EDT EURODIMA universal linking system can be applied at this saw.

10 components can be disassembled within 5 minutes

Time-saving handling through minimal setup time

Double profile at drive wheel

No slipping when starting up

Cutting speeds can be set differently, from 2 to 30 m/sec

Always the right setting for the desired cutting result

Convenient spring-tension system

Wire-sparing

TECHNICAL DATA

NUMBER OF COMPONENTS	10
HEAVIEST SINGLE COMPONENT	21.3 kg / 47 lbs
DIAMOND WIRE STORAGE	6 + 2 m
CUTTING SPEED	2—30 m / sec
SPECIFICATION	6WB6P

Pictured on Prudhoe Bay Alaska, wire sawing on the Alaskan Pipeline.

A basic SB321 Wall Saw package is required and then the 6WB6P wire saw conversion kit can be added to convert the wall saw into a wire saw..
